

GREENWOOD ASSOCIATES, INC.

FRUIT JUICE CONCENTRATES, PUREES AND ESSENTIAL OILS

SINCE 1974

ADDED SUGAR STATEMENT

The majority of our products are 100% from the named fruit/vegetable with no sugar added. Since Greenwood Associates does not know the formulas or processes of our customers' products, we do not include added sugars in our nutritional information. Based on FDA regulation 21 CFR 101.9(c)(6)(iii), these numbers will differ depending on each particular application. Below is our best attempt to guide you in determining the added sugar in your formula. You may refer to our website, www.greenwoodassociates.com, to see our specifications, which list the ingredient statement and brix level of each product. This will allow you to do the calculation according to your formula and process.

“If the juice blend is reconstituted such that the sugar concentration is less than what would be expected in the same amount of the same type of single strength juice (e.g., less than 100% juice), the added sugar declaration would be zero. If the juice blend is reconstituted such that the sugar concentration is greater than what would be expected in the same amount of the same type of single strength juice, the amount of sugar that is in excess of what would be expected in the same amount of the same type of single strength juice must be declared as added sugars on the label.”

Per the FDA, single strength juice Brix levels are as follows:
