## FOREIGN MATERIAL STATEMENT

Greenwood Associates, Inc. agrees that foreign materials have no place in foods. This is why we develop, document, implement and maintain programs to ensure that such materials remain out of our products and processes. We guarantee that all products manufactured in our Niles, Illinois facility utilize foreign material inspections and pass through a screen and magnet to prevent unwanted foreign material contamination. We have also developed and implemented programs to further minimize the potential for foreign material contamination, including our supplier approval and evaluation program, pest management program, glass and brittle plastic control program, cleaning and sanitation schedule, and good manufacturing practices (GMPs).
